

Nebraska Public Power District

Always there when you need us

January 13, 2020

Dear Lake Maloney Leaseholder,

As you are aware, NPPD is the owner and licensee of Federal Energy Regulatory Commission (FERC) Hydroelectric Project No. 1835, which includes Lake Maloney. All tenant and sub-tenant's use of the land and water at Lake Maloney is subject specifically to the adherence of Land Use Article 415 within the license. NPPD has in place Rules and Regulations, a Construction and Permitting Policy and a Construction Application to permit the use of land and waters of Lake Maloney by tenants and sub-tenants in compliance with Article 415. There have been updates made to these documents which are effective immediately and copies of these documents are enclosed with this letter for your reference. Please review these documents and feel free to discard any previous copies you may have on file.

The biggest change you will see deals with the use of any buoy placed in the lake by tenants. The following language is taken out of the enclosed new Construction and Permitting Policy...

BUOYS

The following requirements are for any buoy placed in Lake Maloney:

1. Anyone wishing to place a buoy of any type in Lake Maloney must submit a completed Construction Application to NPPD for approval. Only those buoys approved by NPPD are permitted to be placed into Lake Maloney.
2. All buoys must be placed 30 yards or closer to the shoreline unless approval is granted from NPPD to place the buoy beyond 30 yards. Any Application submitted to NPPD to place a buoy beyond 30 yards must include justification explaining the reasoning to place the buoy beyond 30 yards. Buoys permitted to be placed beyond 30 yards of the shoreline will be a controlled area symbol cylinder buoy (ex. "No Wake", "5MPH") and must meet U.S. Coast Guard specifications.
3. All unauthorized buoys (buoys not granted approval or buoys installed in unauthorized locations), or those buoys deemed unsafe by NPPD must be removed immediately upon receiving written notice from NPPD. NPPD reserves the right to remove all unauthorized buoys.
4. Prohibitory message type buoys (ex. "No Boats", "Stay out") are not allowed to be placed in Lake Maloney except by NPPD or the Nebraska Game and Parks Commission.
5. All buoys must be properly anchored and maintained in a safe manner.

If you intend on putting any sort of buoy in Lake Maloney, please contact me so that we can get them properly permitted. Buoy permits will be considered on a case by case basis and any buoy placed in Lake Maloney will be monitored.

Please feel free to contact me if you have any questions about the enclosed documents.

Sincerely,

Brian Hope

**NEBRASKA PUBLIC POWER DISTRICT
CONSTRUCTION AND PERMITTING POLICY
LAKE MALONEY – LINCOLN COUNTY, NEBRASKA**

GENERAL

Nebraska Public Power District (NPPD) is the owner and licensee of Federal Energy Regulatory Commission (FERC) Hydroelectric Project No. 1835 (Project). The purpose of this construction permitting policy is to define a process to permit non-Project and non-public uses of lands and waters governed by NPPD's FERC License (Article 415 Land Use), specifically, residential access to Project lands and waters and construction of certain permanent or temporary facilities on Project lands or in Project waters by residential tenants, subtenants and/or adjacent landowners. NPPD's FERC license grants it authority to permit certain non-Project and non-public uses of Project lands and waters without prior FERC approval, provided the proposed use is consistent with protecting and enhancing the scenic, recreational, and other environmental values of the Project.

1. The intent of this Policy is to ensure that NPPD is notified of construction at Lake Maloney and that construction projects (including dredge and fill, well, and septic systems) are consistent with NPPD policies and local, state, and federal regulations and license requirements.
2. NPPD's property at Lake Maloney is subject to the regulations and requirements of NPPD's Federal Energy Regulatory Commission License (FERC). FERC requirements are subject to change from time to time.
3. Authorization of an Application for Construction (Application) by NPPD alone does not guarantee a quality design or adherence to applicable codes, etc. Authorization of any construction shall be at the sole discretion of NPPD. NPPD reserves the right to make special rulings in cases not specifically covered by these guidelines. Placing physical improvements on the leased lot without written authorization of NPPD is a violation of the Lake Maloney Lease Agreement. NPPD reserves the right to make alterations to this policy without prior notice. Lake Maloney was constructed to be, and is operated as, a regulating reservoir for NPPD's North Platte Hydroelectric Facility with a high-water operating level of 3,006 feet above mean sea level elevation. NPPD has established a continuous 25-foot strip public access area extending completely around Lake Maloney with its borders defined as along the high-water operating level and going 25 feet outward away from the water.
4. NPPD requires a construction permit for all projects at Lake Maloney that involve any construction activity that occurs exterior of the home, cabin or outbuildings.
5. All Applications for construction projects will be evaluated by NPPD to ensure that NPPD complies with its FERC requirements. Residential use of NPPD lands of Lake Maloney will be done in a manner which protects and enhances the scenic, recreational and environmental values of the property.
6. For purpose of determining setback requirements, eaves, steps, porches, decks, and patios shall be considered part of the building.

PROCEDURE

1. The Lessee shall contact NPPD's Land Management Department in North Platte to discuss the proposed construction and obtain and review the Construction and Permitting Policy and complete an Application for Construction (Application).
2. The Lessee shall complete the Application and submit it to NPPD's Land Management Department in North Platte at the following address:
 Nebraska Public Power District
 Attn: Land Management
 402 State Farm Road
 PO Box 310
 North Platte, NE 69101.
3. NPPD shall review the Application to determine if the proposed construction is consistent with the use of the reservoir and NPPD policies. An on-site review with the Applicant/Lessee may be necessary.
4. NPPD will notify the Lessee of whether the Application is approved, denied, or additional information is needed.
5. If approved, the Lessee may proceed with construction after acquiring all necessary permits required by local, state or federal agencies, and notifying NPPD when construction will begin. NPPD shall not be responsible for any permitting other than reviewing NPPD's Application for Construction.
6. Construction must be completed within 12 months of NPPD approving the Application. If construction is not completed within 12 months, an extension of the Application must be obtained from NPPD. NPPD may require an updated Application for the project in order to issue an extension. Additionally, NPPD may issue notice to stop work if an extension is not granted.
7. Lessee shall contact NPPD's Land Management Department in North Platte when construction is complete.

ROADS

The county roads surrounding Lake Maloney are normally situated on a 66-foot-wide right-of-way; the roadway is usually centered in the right-of-way; however, variances do exist. All other access roads are located on right-of-ways of varying widths. No permanent construction will be permitted in any road right-of-ways.

SURVEYS

Surveys may be required for construction purposes or for NPPD to approve the Application. NPPD must be contacted to determine if a partial or full lot survey will be required in order to locate the survey pins for each lot, and Lessee shall pay NPPD for the cost of the survey.

CONSTRUCTION PLANS

The Application for Construction submitted by Lessee must include plans showing the locations of existing improvements as well as the proposed construction as it will be constructed on Lessee's lot. If the Application is authorized by NPPD and there are any changes or adjustments to the original plans, a new Application may be required along with new plans. It is the responsibility of the Lessee to gain approval, through a Land Use Permit, for planned

construction and improvement for property from the Lincoln County Planning and Zoning Department located at 211 West 3rd Street, North Platte, Nebraska 69101.

DWELLINGS

Dwellings must be constructed from all new material. Acceptable setbacks for dwellings will be determined by the Lincoln County Planning and Zoning Department and NPPD, and will be issued considering NPPD's operational needs, regulatory requirements and limitations set by other agencies having jurisdiction over the property.

Custom built homes, modular homes and manufactured homes shall comply with the following minimum requirements:

1. The home shall connect to a water system and a sanitary sewer system approved by the State of Nebraska and conform to any other state, county, or federal requirements.
2. The home shall have no less than 900 square feet of floor area.
3. The home shall be placed on a permanent foundation, which conforms to the latest publication of the Uniform Building Code.
4. The home shall have no less than an 18-foot exterior width.
5. The roof shall be pitched with a minimum vertical rise of 2.5 inches for each 12 inches of horizontal run.
6. The exterior material shall be of a color, material, and scale comparable with those existing in residential single-family housing areas.
7. The home shall have a non-reflective roof material, which is or simulates asphalt or wood shingles, tile, rock or colored metal.
8. The home shall have wheels, axles, transporting lights and towing apparatus removed.
9. Modular and/or manufactured homes shall bear a label certifying that the home was built in compliance with the National Manufactured Home Construction and Safety Standard, 24 C.F.R., Part 3280, promulgated by the United States Department of Housing and Urban Development, or if a modular housing unit, as defined by Neb. Rev. Stat. Section 71-1557, bearing the seal of the Department of Health and Human Services Regulation and Licensure.
10. All new dwellings and additions to existing dwellings are required to meet minimum setbacks as established by NPPD and Lincoln County Planning and Zoning Department, or other jurisdictional agencies from the shoreline, side lot line and road right-of-way to promote reasonable use and public access to the project lands and waters, and shall provide for project operational and maintenance needs and protect the aesthetic resources of the area, including lake views from the properties of others, from unacceptable adverse impacts as determined by NPPD. Dwellings shall be located no closer than 25 feet from the high-water operating level.

OUTBUILDINGS

Garages, storage sheds and any other outbuildings must meet all jurisdictional requirements and may not be constructed closer than 25 feet from the high-water operating level. Outbuildings

must be constructed from all new material. Galvanized metal siding and roofing will not be permitted. Eave heights for outbuildings cannot exceed 10 feet above natural ground.

FENCES

An Application and NPPD authorization are required for all fence installation. Fences must be located on lot lines as surveyed. No fence may be located within 25 feet from the high-water operating level. The top of the fence should be as low as practical to minimize visual interferences with the neighbors' view of the lake.

TREE REMOVAL

An Application and NPPD authorization are required for all tree removal activities. Tree removal shall not occur from the dates of April 1 to September 1. April 1 to September 1 is considered the migratory bird nesting time-period. NPPD may authorize tree removal within this time period provided the tree removal contractor can verify to NPPD there are no active nests in the tree at the time of removal.

WATER WELLS

Water wells shall be located, constructed, repaired and decommissioned in a manner to meet current state health standards, rules and regulations. For more information and approval, contact the Nebraska Department of Health and Human Services at 308-535-8200.

SEPTIC SYSTEMS

Septic systems shall be located, constructed and repaired in a manner to meet current state health standards, rules and regulations. Construction of a septic system shall be completed by a certified installer. It is a State of Nebraska requirement that the certified installer who constructs a standard septic system for a dwelling, must submit certain information and obtain approval from the Nebraska Department of Environmental Quality. For more information, contact the Nebraska Department of Environmental Quality at 308-535-8141.

WATER SOURCE HEAT PUMPS

Closed loop water source heat pumps are allowed per county, state and federal regulations. Open loop water source heat pump systems are not allowed on Lake Maloney property. An approved permit is required from the Nebraska Department of Environmental Quality for the installation of a closed loop system.

DOCKS, LIFT STATIONS AND WALKWAYS

An Application for new construction or modification of existing docks, lift station or walkways is required. Docks and walkways must conform with the following minimum requirements:

1. All flotation materials must be puncture resistant and will not sink if punctured.
2. Steel drums are prohibited, and beaded polystyrene will not be permitted for new construction or as replacement flotation for existing facilities.
3. Reflectors must be placed on the two furthest corners of the structure that extend into the water and along the sides of the structure from the lake end back toward the shore.

4. NPPD reserves the right to determine or change all dock configurations and placement located on Lake Maloney.
5. Electrical service placed on docks, lift stations or walkways must be installed, operated and maintained in accordance with the requirements of the National Electrical Code and any applicable county and state codes.
6. Diving boards are not allowed.
7. Swimming rafts and similar objects that are located in the water, but not attached to the shore or a dock, shall be allowed only if occupied and only during daylight hours.

BUOYS

The following requirements are for any buoy placed in Lake Maloney:

1. Anyone wishing to place a buoy of any type in Lake Maloney must submit a completed Construction Application to NPPD for approval. Only those buoys approved by NPPD are permitted to be placed into Lake Maloney.
2. All buoys must be placed 30 yards or closer to the shoreline unless approval is granted from NPPD to place the buoy beyond 30 yards. Any Application submitted to NPPD to place a buoy beyond 30 yards must include justification explaining the reasoning to place the buoy beyond 30 yards. Buoys permitted to be placed beyond 30 yards of the shoreline will be a controlled area symbol cylinder buoy (ex. "No Wake", "5MPH") and must meet U.S. Coast Guard specifications.
3. All unauthorized buoys (buoys not granted approval or buoys installed in unauthorized locations), or those buoys deemed unsafe by NPPD must be removed immediately upon receiving written notice from NPPD. NPPD reserves the right to remove all unauthorized buoys.
4. Prohibitory message type buoys (ex. "No Boats", "Stay out") are not allowed to be placed in Lake Maloney except by NPPD or the Nebraska Game and Parks Commission.
5. All buoys must be properly anchored and maintained in a safe manner.

SHORELINE IMPROVEMENT AND PLACEMENT OF DREDGE AND FILL MATERIAL IN LAKE MALONEY

The discharge of dredge and fill material into the waters of the United States, which includes Lake Maloney, requires written authorization from the U.S. Army Corps of Engineers and NPPD. NPPD has received a Programmatic General Permit from the U.S. Army Corps of Engineers which authorizes Lessees at Lake Maloney to construct or repair revetments and bulkheads on the leased properties to a maximum of 500 feet according to the guidelines established in this Construction and Permitting Policy, after receiving written authorization from NPPD. Requests for longer lengths will be considered and require an individual permit to be approved by the U.S. Army Corps of Engineers. No dredge or fill material shall be placed in Lake Maloney below the normal high-water line until written authorization is received from NPPD by means of an Application.

All dredge and fill projects shall comply with the following minimum requirements:

1. The following items may be used for dredge and fill material for the construction or maintenance of revetments, bulkheads and sea walls: (1) clean broken concrete free of any metal (rebar or metal reinforcement); (2) rock; (3) formed or fabricated concrete; (4) sheet metal with metal or wood piling; (5) plastic or PVC; (6) untreated timber; (7) fiberglass; or (8) vegetation including, but not limited to, grasses or willows. No other materials may be used.
2. Revetments, bulkheads and sea walls shall be constructed in a manner that will not adversely affect the shoreline contours or slopes of NPPD's property or any adjoining property and shall not cause excessive diversion of storm water runoff onto adjoining property.
3. All fill material must be confined landward of the structure and be free of debris or pollutants. Exposed reinforcing bar and mesh shall be removed from broken concrete prior to placement as stabilization.
4. Vegetation clearing in or adjacent to Lake Maloney shall be held to a practicable minimum. Upland vegetation disturbed by construction must be re-established to prevent sedimentation into Lake Maloney.
5. Measures shall be taken to prevent any petroleum products, chemicals or other deleterious materials from entering Lake Maloney. Any materials, which are accidentally spilled into Lake Maloney during construction, must be immediately reported to NPPD and removed by a certified hazardous material handler. All costs associated with the spill cleanup will be at the expense of the Lessee.
6. All work in Lake Maloney shall be performed in such a manner that will minimize increases in suspended solids and turbidity, to prevent degradation of water quality and damage to aquatic life outside the immediate area of construction.
7. Fill material for the construction of revetments and bulkheads shall not exceed one cubic yard per linear foot below the normal high-water line.

SPECIAL CONDITIONS

There are existing structures and improvements installed prior to the effective date of this Construction Policy, which are not compatible with the requirements of this policy. Existing structures may be maintained in their existing condition, even though their use does not conform with the guidelines contained herein. When it becomes necessary to replace a previously installed non-complying structure due to major repairs (defined as more than 50% of the physical structure or of its value, as determined by NPPD), or if the facility becomes unsafe, the new structure must comply with the guidelines which are in place at the time the upgrade or change to the structure is required and must conform with current NPPD, county, state and federal guidelines.

NPPD reserves the right to stop construction for any violations that are detected. Stopping construction may result in construction delays, modifications or removal of non-complying structures, restoration of the disturbed area at the Lessee's expense, and loss of consideration for future construction requests. NPPD shall not be responsible for any damages to Lessee as a result of stopping construction for any violations that are detected.

**NEBRASKA PUBLIC POWER DISTRICT
RULES AND REGULATIONS
LAKE MALONEY - LINCOLN COUNTY, NEBRASKA**

Nebraska Public Power District (NPPD) has adopted the following rules and regulations which shall govern the use of and conduct upon all lots located at Lake Maloney, Lincoln County, Nebraska. Lake Maloney is part of the Sutherland Project No. 1835 license issued to NPPD by the Federal Energy Regulatory Commission (FERC) to produce electricity at the North Platte Hydroelectric Plant. NPPD, without prior notice, reserves the right to make alterations to these Rules and Regulations at NPPD's or FERC's discretion. Any changes shall be communicated, in writing, to all Lessee's.

DEFINITIONS

Lots are tracts of property owned, surveyed, platted and recorded by NPPD, and include all structures and improvements located upon said lot used for storage of boats, personal property, or living quarters.

Public Access Areas include those tracts of land maintained by NPPD where public use and access is permitted to the general public, along with those tracts of land leased to the Nebraska Games and Parks Commission. NPPD has established a continuous 25-foot strip public access area extending completely around Lake Maloney with its borders defined as along the high-water operating level and going 25 feet outward away from the water.

NPPD shall mean Nebraska Public Power District, its officers, employees, and agents.

Lessee shall mean individuals, associations, corporations, or organizations that have entered into written lease agreements with NPPD, and their guests, invitees, and licensees.

RULES AND REGULATIONS

1. No permanent signs, advertisements, or billboards of any kind shall be erected or exhibited in any manner on or above a lot or any other NPPD lands without written approval from NPPD. A name and address sign, the design of which shall be furnished by the Lessee, shall be permitted upon the approval of NPPD. Permission for the erection of any sign shall be subject to the sole discretion of NPPD. Signs, posts, or devices supporting mailboxes shall not in any way encroach upon road ditches.
2. No cattle, horses, sheep, poultry, hogs, or any other livestock shall be kept or maintained on any lot by any Lessee. This paragraph shall not be construed, however, in any manner to interfere with the reasonable keeping of ordinary domestic pets upon any lot. All domestic pets shall be on a leash or confined to the Lessee's lot.
3. No house trailer, mobile home, camper, or tent shall be used by Lessee for storage. Guests of Lessees may park campers or tents on a Lessee's lot for temporary living quarters.
4. No lot shall be used as a junkyard, storage place, or graveyard. No lot shall be used for depositing, dumping, open burning, or storing of any refuse, trash, garbage, or discarded material. All rubbish, trash, and garbage shall be removed from any lot and deposited in an area maintained for that purpose and outside of the property belonging to NPPD.
5. Each Lessee shall be responsible for maintaining their lot in a good and sightly condition. No refuse shall accumulate on the lot except in covered containers. Lessee shall not permit such refuse, including fallen leaves, grass clippings and the trimmings of trees or shrubs to be deposited in Lake Maloney, adjacent to the shoreline, on the road right-of-way's, on NPPD premises, or on premises open for public use. The lot shall be kept free of hazards, including dead and dying trees. Firewood and other similar material shall be stacked and maintained to control rodents, etc. All vegetation shall be trimmed or mowed to present a good appearance. Lake Maloney shall not be used as a disposal area by the Lessee.
6. No rifles or pistols shall be discharged upon any lot or on other property belonging to NPPD. Shotguns may be discharged in designated areas only, as posted by NPPD and governed by Nebraska Game and Parks regulations

7. All exterior lighting upon any residential lot shall be installed and maintained in such a manner as not to disturb the Lessee of any other residential lot.
8. Existing natural drainage may not be changed or altered without the written approval of NPPD. The shoreline of the lot shall be reasonably protected from erosion.
9. No loud noises shall be emitted from a speaker or mechanical device of any kind, whether interior or exterior type, that would disturb any other Lessee of a lot.
10. Private passenger automobiles and pickup trucks may be parked in driveways only. Trucks larger than pickups, tractors, and other off-road equipment shall not be kept on any lot except in an enclosed garage or an area designated by NPPD. No motor vehicle, which is under repair or not in operating condition, shall be placed or permitted to remain upon any lot for a significant length of time as determined by NPPD, unless it is kept within an enclosed garage.
11. All plans and specifications for any new structure, alterations or improvements to existing structures, all dredge and fill shoreline projects, and all wells and septic system plans must be submitted to NPPD through an Application for Construction supplied by NPPD. Written authorization for the materials, harmony of design, aesthetic effect, size and location including the grade and elevation, shall be obtained from NPPD in writing prior to commencement of construction. The issuance of such authorization shall be within the sole discretion of NPPD.
12. No building or structure shall be constructed upon or moved from another location onto said lot without prior written authorization of NPPD. All construction, including dwellings, outbuildings, wells, fences, septic systems, etc., shall conform to NPPD, Lincoln County and the State of Nebraska building codes and regulations.
13. All dredge and fill projects will utilize approved fill material that meets all NPPD, state and federal regulations. Vegetation clearing for projects will be kept to a practical minimum and will be re-established to prevent sedimentation into Lake Maloney. Dredge and fill shoreline projects may not be used to alter the location of existing shoreline. All projects will conform to NPPD, county, state and federal codes and regulations.
14. Lots designed for single-family residential purposes shall be used for one single-family residence only. No building or structure intended for or adapted for business purposes shall be permitted upon any residential lot.
15. Public areas, road right-of-way's, and unleased NPPD lands shall not be used by Lessees without specific written permission from NPPD. Such public areas shall not be used to store personal property, motor vehicles, etc. During the period from October-April, lift stations and docks may be temporarily stored on public areas deemed available by NPPD. Each lift station or dock must be marked to identify ownership. NPPD reserves the right to remove, at owner's expense, all unauthorized or unmarked items from unleased NPPD land at any time to facilitate mowing and other maintenance.
16. Fees: Lessee's shall pay to NPPD a \$100.00 administrative fee at the time of closing, for the issuance of a Lease Agreement on the initial purchase of a Leasehold interest in a residential lot. Lessee shall be responsible for all recording fees for documents required to be of record with Lincoln County. NPPD shall produce all Lease Agreements and Assignments associated with any Lake Maloney lot. All surveying activities requested of NPPD by Lessee will be performed on a fee basis.
17. The Lessee of a lot shall not, directly or indirectly lease, sublease or otherwise hold any interest in more than one residential lot at Lake Maloney. Obtaining an interest in more than one lot by one person by himself or through an agent or nominee shall be an event of default under the lease. This provision may be waived by NPPD in writing for a period, not to exceed twelve (12) months, if the Lessee is actively in the process of disposing of the interest in any additional lot.
18. The installation of buoys in Lake Maloney by any Lessee is prohibited, unless specifically authorized by NPPD through an Application for Construction supplied by NPPD.

19. NPPD has established a continuous 25-foot strip public access area going completely around Lake Maloney with its borders defined as along the high-water operating level and going 25 feet outward away from the water along the high-water operating level of 3,006 feet above mean sea level, to allow for passage by the public for outdoor recreational activities and for access by the public in emergency situations. The shoreline shall be open at no cost to the public. Those persons interfering with the public peace or the rights of others to the use and enjoyment of said shoreline shall be subject to removal from the premises by proper law enforcement authorities. Lessee's of lots along the Lake Maloney shoreline do not have exclusive use of there leased lot area that borders the Lake Maloney shoreline.
20. The storage of motor fuels and chemical products shall not be within 50 feet of the shoreline and shall not exceed ten (10) U.S. gallons per container, nor a combined total capacity of fifty (50) U.S. gallons, and must be properly stored in U.S. Coast Guard approved containers. This storage quantity limitation does not apply to heating fuels and motor vehicle gasoline, as sold by a permitted and licensed retailer, that are stored in conformance with applicable local, state and federal laws and regulations.
21. Electrical service placed on docks, lift stations or walkways must be installed, operated and maintained in accordance with the requirements of the National Electrical Code and any applicable county and state codes.
22. All fishing, hunting and boating activities at Lake Maloney are subject to the rules and regulations set forth by the Nebraska Game and Parks Commission and are adopted by NPPD.

**NEBRASKA PUBLIC POWER DISTRICT
APPLICATION FOR CONSTRUCTION
(INCLUDES DREDGE AND FILL PROJECTS, WELLS, SEPTIC SYSTEMS)
LAKE MALONEY – LINCOLN COUNTY, NEBRASKA**

Applicant: _____

Lot No./Address: _____

Phone Number: Home - _____ Cell - _____

Please give a description of the proposed construction or dredge and fill project. For a dredge and fill project, describe the reason(s) for the fill, the length of the project, the type(s) of fill material to be used and the amounts of each type of fill material in cubic yards. Attach additional information or drawings if needed:

Contractor: _____

Contractor phone number: _____

Draw a plan of the proposed construction, dredge and fill project, well or septic system modification, at the left, showing dimensions. Attach drawings, if available. Show existing improvements, including buildings, patios, fences, wells, underground pipes, septic tank and field, driveway, roads, sea walls, and lakeshore using symbols shown below.

Symbols:

- + Septic tank
- +-+ Septic field
- x-x-x Fences
- Existing buildings
- _____ New building
- o Power poles
- w Well
- o-o- Underground pipes

Indicate north by an arrow.
